## **Short Description of the Company**

Bee Technologies (Bee Tech) S.A is mainly a Services company, strongly focusing in the field of Intelligent Transport solutions (ITS) for road networks as well as networking solutions.

Bee Tech as one of the emerging companies in the field of ITS especially road tolling systems and operations, believes fully in **interoperability**.

It is important to point out that we focus on fundamental needs of services (proper coordination with policy makers, infrastructure owner/operator, administrators, end users/individual travelers, and drivers) and system supplier.

Our market strategy is to focus on our customer's needs & requirements and bring added value to our customers' offerings.

Our goal is to offer services to our customers with the spirit of partnership, reliability, transferring experience, creativity of solutions and flexibility in providing solutions.

### **Skills:**

Software development for fully automated or semi-automated payment systems

System integration

Automatic Fare Collection System for public transport sector

Scada management and Scada operating systems

Parking & fleet Management Solutions

Integrated toll and traffic management system

Service and maintenance of Tolling systems as well as infrastructures
