

Hello,

We are interested in taking on an Internship from abroad and hope that you will be able to forward this to the agencies abroad to see if they have anyone that would be interested.

We are a small IT consultancy providing accounts and database solutions to our customers based in London.

If you look at our website you will find that we are very big in the supply of Sage accounts products.

We are pleased to offer work placements for IT students on a full time basis for periods of up to 12 months.

The type of work the intern can be expected to do is varied but can include:

- Installation of range of Sage products onto customer networks
- Consultancy on Sage product range
- Telephone support
- Software development to add additional functionality
- Web site designs and enhancements for customers
- Marketing includes an account management role
- Telesales to existing Sage customers
- Advising customers on new product releases
- Advising customers on the benefit of upgrading to new version
- Cross selling products to existing customers

Kind Regards,  
Chris
